

Dear Prospective Parent,

When our son was about 3, we met the founders and other families of Cornerstone Christian School through the church we began attending. We loved hearing the stories about Cornerstone and meeting some of the children who attended there. At that time, we thought it sounded like a wonderful school to attend, but knew that we would not be able to handle that choice financially.

By the time our son was close to Kindergarten age, God had provided financially for us to look into Cornerstone as an option. We were already excited about the school as we loved the families we knew and already knew the Kindergarten teacher.

We visited classrooms and checked out the requirements, expectations, paperwork, etc. But what solidified the decision to enroll our son was when we attended a CCS Graduation in the Spring. Hearing the testimonials from the Seniors was so inspiring. Not only were they well-spoken and comfortable in front of a crowd, but they spoke of the sacrifices of their parents and an appreciation for the godly and caring staff who came alongside their parents, guiding students through the school years. We knew we wanted our son in a school like this one that produced graduates like that.

Our son started at Cornerstone in Kindergarten and except for a year of homeschooling, attended all the way through 12th grade. Each year brought us teachers who worked tirelessly to teach the word of God to the students as well as rigorous academics and other activities. We appreciated the strict-but-fair approach in many classrooms and a commitment to training children up to respect and obey authority while still thinking for themselves. We were fully supportive of the school, which included David serving on the Board for many years, and Lisa working and volunteering for the school. We were happy to be a part of the Cornerstone Family!

Our son did well academically but also enjoyed participating in many school activities over the years, which included: Poetry Contests, Music Concerts, Boy Scouts, Community Service, Choir, Basketball, Volleyball, Plays, and Student Leadership. Through Bible classes, he was given a solid foundation in faith that continues to be built on through church and family. He graduated from Cornerstone and is now in his second year as a Computer Science major in the Honors Program at California State University, Sacramento. He is doing very well in school and credits Cornerstone for preparing him for the challenges of college.

We are thankful to the Lord for directing our path to Cornerstone and helping our family to make the necessary sacrifices and prioritizations in order to keep our son in Cornerstone. It was all well worth it, in our opinion.

Sincerely,
David and Lisa Watson
